

VITO POPLAR PANEL
DRY ROOM ONLY

Vito Poplar Panel: Natural Elegance – Seamless Finish

REAL WOOD – TIMELESS BEAUTY

Give your home or project a timeless feel with Vito Poplar Panel. This product combines the beauty of nature with modern functionality. With a genuine poplar wood surface and a concealed click system, it provides a seamless and elegant finish – easy to install, beautiful to behold.

SMART DESIGN – EASY INSTALLATION

Vito Poplar Panel is designed to create a seamless wall surface without visible joints. Thanks to its integrated click system, the panels can be installed quickly and efficiently without exposed screws or gaps between them. This ensures a **high-end, cohesive look** while making installation effortless.

Poplar is a popular wood species with a natural grain structure. The panels with a poplar surface are **sustainably produced** from renewable materials.

- **Warm and natural look** with a hidden fastening system
- **Easy to work with** – strong screw-holding properties
- **For dry environments** – perfect for living rooms, bedrooms, offices, and other indoor spaces

TIPS FOR THE BEST INSTALLATION EXPERIENCE

- Use Fibo Screws during installation. Together with the unique click-lock system, the right accessories ensure a perfect result and an almost seamless finish.
- Staples (min. 10x35 mm) can be used if Fibo Screws are not the preferred option.
- Untreated surface – can be lacquered to enhance the wood grain or customized to your desired style.
